

## Review of Questionnaire from Public Meeting

Seventy (70) completed forms but four (4) were unsigned and therefore discounted.

Every respondent (66) agreed with the first objective: to maintain the rural character of the parish, its village and hamlets. The vast majority agreed with the second objective: to minimise the effects of further developments on the countryside, landscape and ecosystems.

Do you agree with the NDP vision			Yes	65	No	1
Should we review the Almeley Settlement Boundary			Yes	29	No	34
Which option do you prefer for Woonton	Settlement Boundary	21	Infill Frontage	14	Neither	22

Regarding the options for future housing, five (5) forms excluded the preference rating leaving a sample of sixty one(61). There have been two forms of analysis on this data, one using average preference ratings, the other giving a weighted score to each choice.

Analysis 1: Averaging the preference ratings

Preference rating	Options					
	1	2	3	4	5	6
1	12	24	1	4	6	6
2	7	4	4	8	14	13
3	4	12	8	4	9	14
4	19	2	11	7	6	2
5	4	5	6	19	5	6
6	5	4	23	10	14	8

Average Preference ratings (1+2+3) – (4+5+6)

1	2	3	4	5	6
23 - 28 = -5	40-11= +29	13 - 40 = -27	16 - 36 =-20	29 - 25 = +4	33 - 20 = +13

Preferences ordered most supported to least supported are therefore options **2,6,5,1,4 & 3**

Analysis 2: Weighting the preference choices, where a 1<sup>st</sup> choice is given 6 points, down to 6<sup>th</sup> choice getting 1 point

Option	Options for location of housing					
	1	2	3	4	5	6
Weighted Score	201	265	145	169	199	217

Preferences ordered most supported to least supported are therefore options **2,6,1,5,4 & 3**

The overwhelming majority of residents who responded agreed with the approach to the types of accommodation suggested and to the approach for affordable housing.

Very few responses expressed any views on any issues, those that did tended to raise a number of matters, so the following is not really a reflection of the opinions of the Parish

Minimum/no additional housing, leave as it is	14
Concerns over highway capacity	8
Concerns over drainage/ infrastructure	3
More affordable housing/family homes/shared ownership/self build/social housing	12
Concerns over pollution/environmental issues	10
Faster Broadband	5
Better/ more modern house design	2
Protect nature/special trees/mature oaks	2
More facilities for children	4
