

Definition of Risk Management

Risk is the threat that an event or action will adversely affect the Parish Council's ability to achieve its objectives and to successfully execute its strategies. Risk management is the process by which risks are identified, evaluated and controlled. It is a key element of the framework of governance together with community focus, structures and processes, standards of conduct and service delivery arrangements.

The Parish Council is aware that although some risks can never be eliminated fully, it has in place a strategy that provides a structured, systematic and focuses approach to managing risk, which:

- Identifies the subject
- Identifies what the risk may be
- Identifies the level of risk
- Evaluates the management and control of the risk and records findings
- Reviews, assesses and revises procedures if required

The following are the identified areas of risk. There is a separate Risk Management policy to be referred to as appropriate.
